

OBJECTIVES

The participant will be able to ...

- Review with practice the basics of Spanish pronunciation and develop speaking and listening skills.
- Develop a base vocabulary of medical terms and phrases needed by a mammographer with the Spanish-speaking patient.
- Discuss the differences between needle aspiration, FNA, core needle biopsy, vacuum-assisted biopsy, rotating core biopsy, needle localization and open surgical biopsy.
- Identify the differences between stereotactic, ultrasound and MRI-guided breast biopsies.
- Identify breast anatomy and physiology.
- Discuss breast cancer prevention and lifestyle factors that can reduce risk.
- Have an understanding of the nuclear medicine lymphoscintigraphy and sentinel lymph node biopsy, and the interaction and coordination of the Mammography and the Nuclear Medicine departments.
